Akos was an excellent TA. He clearly understood the material well and was excited about the subject. He was very systematic in presenting the models which made it easy to follow. He was also very accessible on email and in person.

I think you might have been only my second TF at Harvard who promptly graded psets which I so greatly appreciate. It would be helpful if you announced the same set of summary statistics each time. Your lectures/sections were good, although sometimes your answers to questions were more like repeating what you already said, rather than trying to explain it a different way.
