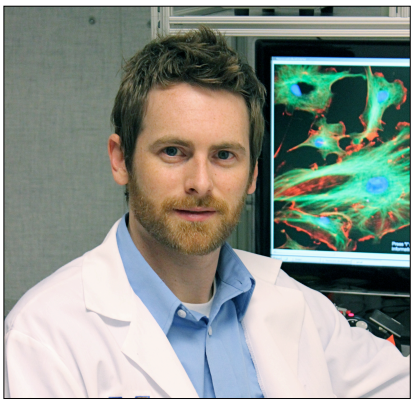
Gregory J. Baker, PharmD, PhD
American Cancer Society Postdoctoral Fellow
Laboratory of Systems Pharmacology
Department of Systems Biology
Harvard Medical School
200 Longwood Avenue, WAB 444
Boston, MA 02115
Cell: (401) 556-5806
Email: gregory_baker2@hms.harvard.edu



EDUCATION:

Postdoctoral - Laboratory of Systems Pharmacology / Department of Systems Biology
Harvard Medical School, Boston, MA 02115
Principle Investigator: Peter K. Sorger, Ph.D.
Project title: *"System-wide Analysis of Glioblastoma-induced Immunosuppression"*

PhD - Department of Molecular and Medical Pharmacology,
David Geffen School of Medicine University of California –
Los Angeles (UCLA), Los Angeles, CA 90095
Dissertation advisor: Pedro R. Lowenstein, M.D., Ph.D.
Dissertation title: *"Invasion and Evasion: Investigations on Early Glioblastoma Growth Reveal Two Novel Mechanisms of Brain Tumor Progression"*
Date of completion: December 19, 2014
Cumulative GPA: **3.94 (on 4.0 scale)**

PharmD - College of Pharmacy
University of Rhode Island, Kingston, RI 02881
Concentration: Research
Date of completion: May 20, 2007
Honors: **Summa Cum Laude**

LICENSURE/CERTIFICATION:

Registered Pharmacist (RPH)
State of Rhode Island and Providence Plantations Department of Health
License number: RPH04665
Status: Active

Registered Pharmacist (RPH)
State of California Department of Health
License number: RPH62004
Status: Active

CPR Certified
American Red Cross, Rhode Island Chapter

First Aid Certified
American Red Cross, Rhode Island Chapter

PROFESSIONAL SUMMARY AND OBJECTIVE:

Highly motivated translational neuro-oncologist with a passion for his work. Holds doctorates in pharmacy and philosophy. Eight-years work experience in both molecular biology and chemistry laboratories. A creative thinker with strong verbal, listening, and written skills adept to multitasking, time-management, and hard-work. Goal oriented and committed to producing honest science for the benefit of human health and knowledge.

Areas of technical expertise:

- Tissue Culture
- Genetic Cloning
- Virus-mediated Gene Transfer
- Intracranial Stereotactic Surgery
- Microscopy (intravital multiphoton, confocal, epifluorescent, electron)
- Stereology
- PCR
- Western Blotting
- Immunohistochemistry /Histology (fluorescence, DAB-peroxidase, H&E, Nissl)
- Flow Cytometry
- Animal Handling

RESEARCH EXPERIENCE:

Department of Systems Biology/Laboratory of Systems Pharmacology, Harvard Medical School, Boston, MA

September 2015 – Present

The department of Systems Biology at Harvard Medical School uses quantitative measurements of the behavior of groups of interacting components, systematic measurement technologies such as genomics, bioinformatics and proteomics, and mathematical and computational models to describe and predict complex dynamical behavior at the cell and molecular level.

Postdoctoral Fellow

- Attend weekly seminars
- Review current literature in applicable fields of study and write reviews/summaries
- Present experimental updates at weekly lab meetings

Departments of Neurosurgery and Cell and Developmental Biology at the University of Michigan, Ann Arbor, MI

August 2011 – Present

Part of the University of Michigan's Health System, the Department of Neurosurgery is devoted to training excellent neurosurgery residents and researchers of diverse neurological disorders, providing them with progressive responsibility that nurtures both clinical and research skills.

The Department of Cell and Developmental Biology at the University of Michigan Medical School educates and trains undergraduate, graduate, professional and post-graduate students in the areas of cell biology, embryology, neurobiology, organogenesis and developmental biology.

Postdoctoral Fellow (January 2015 – September 2015)

- Attend weekly seminars
- Review current literature in applicable fields of study and write reviews/summaries
- Present experimental updates at weekly lab meetings

Visiting Ph.D. Candidate (August 2011 – December 2014)

- Complete all required graduate coursework
- Attend weekly seminars
- Review current literature in applicable fields of study and write reviews/summaries
- Write mock grant proposals to advance to candidacy
- Present experimental updates at weekly lab meetings

- Prepare Ph.D. dissertation based on scientific investigation performed throughout graduate career

Department of Molecular and Medical Pharmacology at UCLA, Los Angeles, CA
September 2008 – December 2014

Housed at the David Geffen School of Medicine, the Department of Molecular and Medical Pharmacology is home to a diverse community of talented professors and investigators whom actively contribute to avant-garde research and technologies.

Ph.D. Candidate

- Complete all required graduate coursework
- Attend weekly seminars
- Review current literature in applicable fields of study and write reviews/summaries
- Write mock grant proposals to advance to candidacy
- Present experimental updates at weekly lab meetings
- Prepare Ph.D. dissertation based on scientific investigation performed throughout graduate career

Board of Governors Gene Therapeutics Research Institute, Cedars-Sinai Medical Center, Los Angeles, CA
December 2008 – August 2011

As the largest nonprofit hospital in the western United States and a leader in basic and clinical research, Cedars-Sinai brings advancements in medicine directly from the laboratory to the bedside earning the medical center the title of "One of America's Best Hospitals" as ranked by the 2009 *U.S. News and World Report*.

Graduate Student Researcher

- Worked on Ph.D. dissertation entitled, *"The Cellular and Molecular Basis of Early Glioblastoma Growth and Invasion"*

  Methodologies implemented to achieve this goal:

  - Tissue culture of transformed and primary eukaryotic cells
  - Murine stereotactic neurosurgery
  - Western blot analysis
  - Immunohistochemistry on formalin-fixed coronal brain tissue sections
  - Epifluorescent, confocal, and *in-vivo* multiphoton microscopy
  - Three-dimensional reconstructions of the tumor microenvironment with the aid of *in-silico* modeling software

Jing Huang Laboratory, Department of Molecular and Medical Pharmacology, UCLA, Los Angeles, CA
September 2008 - November 2008

Research group focused on the development and application of molecular and "-omic" technologies in order to study molecular and higher-order functions in times of physiology as well as pathology.

Rotation Experience

- Helped develop an affinity-based method for drug target identification called Drug affinity responsive target stability (DARTS). This novel method has several advantages over current target identification methodologies. [Patent pending]

Department of Biomedical and Pharmaceutical Sciences, University of Rhode Island, College of Pharmacy, Kingston, RI

January 2007 - March 2007

A graduate level program which offers M.S. and Ph.D. level degrees throughout many facets of science; all with drug discovery and development as a unifying cornerstone. The department has strong affiliations with the college of pharmacy and also houses the Rhode Island INBRE Research Facility; a state-of-the-art research laboratory with the goal of fostering the advancement of biomedical research within the state of Rhode Island.

Co-Investigator

- Undertook preliminary studies dealing with the identification of extra-articular areas of lubricin/PRG-4 gene expression in a rat model
- Techniques employed throughout sample isolation were dissection; tissue excision; and peritoneal, pleural and bronchoalveolar lavage
- Techniques employed throughout analysis were SDS-PAGE, western blotting, and quantitative real-time polymerase chain reaction (qRT-PCR)
- PI: Clinton O. Chichester, Ph.D.

Office of Pharmaceutical Sciences, Center for Drug Evaluation and Research, Food and Drug Administration, Rockville, MD

September 2006 - October 2006

The office of pharmaceutical Sciences is a division of CDER within the FDA that engages in scientific research to support decision making for application review, standard setting, and technology development. This branch also establishes practices and policies for Chemistry Manufacturing and Controls (CMC) application review.

Research Assistant

- Mined for data within the FDA New- and Abbreviated- Drug Application archives to obtain longitudinal data from a number of pharmaceutical products and their manufactures whose content is proprietary
- Performed statistical and other data analysis on mined data
- Prepared tabulated data in spreadsheet fashion
- PI: Pradeep Sathe, Ph.D.

Pfizer Global Manufacturing, Quality Operations, Pfizer Inc., Groton, CT

June 2006 - August 2006

A subdivision within Pfizer Global Manufacturing whose goal it is to maintain Good Manufacturing Procedures (GMPs) and the accuracy and precision of all intermediate and final compounds throughout the manufacturing of large scale active pharmaceuticals.

Summer Intern

- Performed qualification testing, maintenance, and trouble shooting on both gas chromatographic (GC) and high performance liquid chromatographic (HPLC) instrumentation
- Utilized GC and HPLC techniques to analyze both intermediate and active pharmaceutical ingredients to assure quality throughout the manufacturing process.
- Analyzed both inert and active intermediates throughout numerous synthetic processes in order to ensure tight control on water percentage, heavy metal content, and pH, using Karl-Fischer titrations, atomic absorption spectroscopy, and pH meters, respectively
- Dept. Head: Charles Cicchetti

Research Education for Undergraduates (REU), University of Kansas, Lawrence, KS
May 2005 - August 2005

A ten-week period of undergraduate research during the summer months designed to foster independent research under the supervision of one of twelve senior faculty members. Areas of research were intended to address problems using techniques drawing from the medicinal, organic, and biochemical chemistry paradigms. First-hand instruction on the use of spectrometers (NMR, IR, UV), in conjunction with gas and high performance liquid chromatography provided the means to solve these diverse and challenging scientific problems. The program is designed to give students maximum independence and to provide a full-time research experience on which to base a career decision.

Summer Intern

- Utilized structure-activity forethought and synthetic organic chemistry techniques in order to design and synthesize a small library of novel compounds with anti-endotoxin activity in order to attenuate early *in-vivo* systemic inflammatory responses associated with septic shock and mortality in the ICU
- PI: Sunil David, M.D., Ph.D. and Apurba Dutta, Ph.D.

INBRE Research Core Facility-Summer Undergraduate Research Program (SURP), University of Rhode Island, Kingston, RI
June 2004 - August 2004

A ten-week research program that takes place at the munificent INBRE Core Facility that harbors over two million dollars worth of research instrumentation. The goals of the program are to expose undergraduate students to laboratory research and to familiarize them with the opportunities that exist for careers in biomedical research.

Summer Intern

- Utilized circular dichroism (CD) instrumentation to analyze aminofluorene modified DNA samples with various flanking base pair sequences in order to evaluate the affect of base pair sequence on this carcinogen's intercalation into right-handed DNA.
- PI: Bongsup P. Cho, Ph.D.

OTHER PROFESSIONAL EXPERIENCE:
Walgreens Pharmacy, Warwick, RI
June 1999 - August 2008

One of the largest retail pharmacy chains in America, with locations spanning the continental U.S. and Puerto Rico. There are currently 5,800 stores in operation, of which, about 2,000 are open 24-hours.

Registered Pharmacist (RPH) **July 2007 - August 2008**

- Work according to legal and ethical guidelines to ensure the correct and safe supply of medical products to the general public
- Assist and counsel patients regarding the safe and correct use of prescription, herbal, and over the counter medications
- Serve as liaison with doctors regarding prescription and non-prescription medications
- Enter, maintain and generate third party claims for prescription medications on an electronic database
- Advise patients regarding any adverse side-effects of medicines or potential interactions with other medicines or treatments
- Perform both prospective and retrospective drug utilization review

- Process and validate prescriptions for dispensing

Pharmacy Technician **June 2001 - July 2007**

- Enter prescription medication orders into an electronic database system
- Fill and re-fill prescriptions, make medication updates, maintain prescription inventory
- Generate third party claims
- Prepare prescription medication orders for validation by a registered pharmacist

Service Clerk **June 1999 - June 2001**

- Assist customers to select and purchase specified merchandise
- Answer customer's telephone, and in-person inquiries and direct customers to appropriate sales areas
- Resolve customer complaints and requests for refunds, exchanges, and adjustments
- Provide customers with catalogs and information concerning prices, shipping time, and costs

Cancer Prevention Research Center, University of Rhode Island, Kingston, RI

July 2001 - June 2004

A research organization dedicated to helping people change their behavior for living longer, healthier lives. The CPRC is revered as the innovator of the Transtheoretical model, which is now recognized internationally as one of the most promising approaches to health promotion.

Research Interviewer

- Conduct telephone surveys for various epidemiological research projects related to cancer prevention under grants provided by the National Institutes of Health

PRESENATIONS:

Baker GJ. On-camera interview for the Facebook Live broadcast at the 2017 American Cancer Society Cancer Action Network New England Research Breakfast, The State Room, 60 State Street, Boston, MA, *06/17*

Baker GJ, Berriz G, Thiagarajan PS, Lin JR, Palaniappan SK, Davis SH, Moore JK, Sorger PK. "*A Systems Biology Approach to the Study of Glioblastoma-induced Immune Suppression", 02/17*

- Presented at the QSP-SB Industry and Academia Symposium sponsored by Applied BioMath at Harvard Medical School, Boston, MA.

Baker GJ, Berriz G, Thiagarajan PS, Palaniappan SK, Davis SH, Moore JK, Gerosa L, Sorger PK. "*A Flow-based Immunoprofiling Strategy for Interrogating System-wide Leukocyte Composition in Response to Glioblastoma", 06/16*

- Presented at the Annual Department of Systems Biology Retreat at Sebasco Harbor Resort, Sebasco Estates, ME.

Baker GJ, Chockley P, Zamler D, Castro MG, Lowenstein PR. "*Gr-1$^+$/CD11b$^+$ Myeloid Cells are Required for Natural Killer Cell-mediated Eradication of Galectin-1- deficient Glioma", 11/15*

- Presented at the 20th Annual Scientific Meeting of the Society for Neuro-Oncology at the Marriott Rivercenter, San Antonio, TX.

Baker GJ, Chockley P, Zamler D, Castro MG, Lowenstein PR. "*Natural Killer Cells Require Monocytic Gr-1$^+$/CD11b$^+$ Myeloid Cells to Eradicate Galectin-1-deficient Glioma", 09/15*

- Presented at the 2015 Cancer Center Fall Research Symposium sponsored by the Cancer Center Research Committee at the University of Michigan Health System, Ann Arbor, MI.
- **Selected as 1st Place Abstract**

Baker GJ, Chockley P, Zamler D, Castro MG, Lowenstein PR. "*Glioma-derived Galectin-1 Blocks Natural Killer Cell Immune Surveillance through a Tripartite Mechanism", 05/15*

- Presented at the 14th Annual Immunology Retreat at the Campus Inn at the University of Michigan in Ann Arbor, MI.

Baker GJ, Chockley P, Zamler D, Castro MG, Lowenstein PR. "*Glioma-derived Galectin-1 Blocks Natural Killer Cell Immune Surveillance through a Tripartite Mechanism", 04/15*

- Presented at the American Association for Cancer Research (AACR) Annual Meeting 2015 at the Philadelphia Convention Center in Philadelphia, PA.

Baker GJ, Chockley P, Zamler D, Castro MG, Lowenstein PR. "*Innate Immune Escape Mechanisms Mediated by Glioma-derived Galectin-1", 04/15*

- Guest speaker at the Tumor Immunology & Host Response Program sponsored by at the University of Michigan Health System in Ann Arbor, MI.

Lowenstein PR, Motsch S, **Baker GJ**, Castro MG. "*Mechanisms of Glioma Formation: Exploring Glioma Growth through Dialectic Biological-computational Approaches*", 04/15

- Presented at the 9th IMACS International Conference on Nonlinear Evolution Equations and Wave Phenomena: Computation and Theory at the Georgia Center for Continuing Education, University of Georgia, Athens, GA.

Baker GJ, Chockley P, Zamler D, Castro MG, Lowenstein PR. "*Innate Immune Escape Mechanisms Mediated by Glioma-derived Galectin-1", 03/15*

- Guest speaker at the 2nd Annual Immuno-Hematology Symposium sponsored by the Immuno-Hematology Comprehensive Program at the University of Michigan Health System in Ann Arbor, MI.

Baker GJ, Chockley P, Zamler D, Castro MG, Lowenstein PR. "*Invasion and Evasion: Investigations on Early Glioblastoma Growth Reveal Two Novel Mechanisms of Brain Tumor Progression", 02/15*

- Invited speaker at the Department of Systems Biology at Harvard Medical School in Boston, MA.

Baker GJ, Yadav VN, Motsch S, Koschmann CJ, Calinescu A, Mineharu Y, Camelo-Piragua S, Orringer D, Bannykh SI, Nichols WS, deCarvalho AC, Mikkelsen T, Castro MG, Lowenstein PR. "*Mechanisms of Glioma Formation: Perivascular Glioma Invasion is a VEGF-independent Mechanism of Tumor Vascularization", 11/14*

- Presented at the 19th Annual Scientific Meeting of the Society for Neuro-Oncology at Loews Hotel South Beach, Miami, FL.
- **Selected as a "Top 10" Poster**

Baker GJ, Chockley P, Yadav VW, Doherty R, Ritt M, Sivaramakrishnan S, Castro MG, Lowenstein PR. "*Glioma-derived Galectin-1 is a Potent Suppressor of NK Immunosurveillance", 11/14*

- Presented at the 19th Annual Scientific Meeting of the Society for Neuro-Oncology at Loews Hotel South Beach, Miami, FL.

Baker GJ, Chockley P, Yadav VW, Doherty R, Ritt M, Sivaramakrishnan S, Castro MG, Lowenstein PR. "*Glioma-derived Galectin-1 is a Potent Suppressor of NK Immunosurveillance", 09/14*

- Presented at the 2014 Cancer Biology Graduate Program Retreat in the Towsley Lobby at the University of Michigan, Ann Arbor, MI.
- **Awarded "1st Place Poster"**

Baker GJ, Chockley P, Yadav VW, Doherty R, Ritt M, Sivaramakrishnan S, Castro MG, Lowenstein PR. "*Glioma-derived Galectin-1 is a Potent Suppressor of NK Immunosurveillance", 09/14*

- Presented at the 10th Annual Cell and Developmental Biology Retreat at the Kellogg Biological Station in Hickory Corners, MI.
- **Awarded "Best Graduate Student Presentation"**

Baker GJ. "*Invasion and Evasion: Investigations on Early Glioblastoma Growth Reveal Two Novel Mechanisms of Tumor Progression", 07/14*

- Presented at the Department of Neurology's Neuro-oncology Conference in the DeJong Library (1912 Taubman), University of Michigan Health System, Ann Arbor, MI.

Baker GJ, Chockley P, Yadav VW, Doherty R, Ritt M, Sivaramakrishnan S, Castro MG, Lowenstein PR. "*Natural Killer Cells Eradicate Galectin-1 Deficient Glioma in the Absence of Adaptive Immunity", 05/14*

- Presented at the Department of Neurology's Neuroscience Day 2014 in the Towsley Center, University of Michigan Health System in Ann Arbor, MI.

Baker GJ, Yadav VN, Motsch S, Koschmann CJ, Calinescu A, Mineharu Y, Camelo-Piragua S, Orringer D, Bannykh SI, Nichols WS, deCarvalho AC, Mikkelsen T, Castro MG, Lowenstein PR. "*Investigating the neoangiogenic consequences of the perivascular growth pattern in malignant brain tumors", 05/14*

- Presented at the 50th Annual Meeting of the American Society of Clinical Oncology (ASCO), Cormick Place, Chicago, IL.

Baker GJ, Chockley P, Yadav VW, Doherty R, Ritt M, Sivaramakrishnan S, Castro MG, Lowenstein PR. "*Natural Killer Cells Eradicate Galectin-1 Deficient Glioma in the Absence of Adaptive Immunity", 04/14*

- Presented at the American Association for Cancer Research (AACR) Annual Meeting 2014 at the San Diego Convention Center in San Diego, CA.

Baker GJ, Chockley P, Yadav VW, Doherty R, Ritt M, Sivaramakrishnan S, Castro MG, Lowenstein PR. "*A New Strategy to Heighten Innate Immunity Against Malignant Brain Cancers", 04/14*

- Presented at the 20th Neuro-tumor Club Dinner Meeting at the American Association for Cancer Research (AACR) Annual Meeting 2014, Hotel Solamar, San Diego, CA.

Baker GJ, Chockley P, Yadav VW, Doherty R, Ritt M, Sivaramakrishnan S, Castro MG, Lowenstein PR. "*Glioma-derived Galectin-1 is a Potent Suppressor of NK Immunosurveillance", 02/14*

- Guest speaker at the Inaugural Immuno-Hematology Symposium sponsored by the Department of Pediatrics at the University of Michigan in Ann Arbor, MI
- **Awarded "Best Abstract"**
- **Link to full presentation**: https://www.youtube.com/watch?v=7Br8AMxnKvE

Baker GJ, Xiong W, Bannykh S, Kroeger KM, Mikkelsen T, Nichols WS, Castro MG, Lowenstein PR. "*Galectin-1 Silencing Blocks Perivascular Tumor Growth and Prohibits Tumor Formation in a Model of Glioblastoma Multiforme", 09/12*

- Presented at the 8th Annual Cell and Developmental Biology Departmental Retreat at the Kellogg Biological Station in Kalamazoo MI.

Baker GJ, Xiong W, Bannykh S, Kroeger KM, Mikkelsen T, Nichols WS, Castro MG, Lowenstein PR. "*Galectin-1 Silencing Prohibits a Form of Exclusively Perivascular Tumor Growth and Blocks Lethal Tumor Formation in a Model of Glioblastoma Multiforme", 05/12*

- Presented at the American Society of Gene and Cell Therapy (ASGCT) 15th Annual Meeting in Philadelphia PA.

Baker GJ, Bannykh S, Kroger KM, Castro MG, Lowenstein PR. *"A Pericapillary Mode of Invasion for Early Malignant Glioma"*, 10/10

- Presented at the Annual UCLA Molecular and Medical Pharmacology Retreat at the Hyatt Regency Huntington Beach Resort and Spa and at the Nanomedicine and Drug Delivery Research Conference at Cedars-Sinai Medical Center, Los Angeles, CA.

Baker GJ, Castro MG, and Lowenstein PR. *"Early Time Points in Murine Glioma Development"*, 1/10

- Presented at the Molecular and Medical Pharmacology Departmental Research Day at UCLA and at the Nanomedicine and Drug Delivery Research Conference at Cedars-Sinai Medical Center, Los Angeles, CA.

Baker GJ. *"Elucidating Extra-articular Areas of Lubricin Expression in a Rat Model: Preliminary Studies"*, 3/07

- Presented to Gregory Jay, M.D., Ph.D. and colleagues in the Coro Research Building at Rhode Island Hospital. This research group is affiliated with Brown University and is a group we have recently collaborated with.

Baker GJ, Norigian G. *"Sequence Effect on the Thermodynamics and Structures of Aminofluorene-Modified DNA"*, 10/04

- Presented at the 26th Annual Pharmacy Student Research Conference – Eastern States, in West Virginia. Sponsored by The Merck Company Foundation and West Virginia University School of Pharmacy.

OTHER ACADEMIC PARTICIPATION:

American Society of Gene and Cell Therapy (ASGTC) 15th Annual Meeting in Philadelphia, PA.
05/12

- National meeting.

American Pharmacists Association 2006 Annual Meeting and Exposition in San Francisco, CA.
04/06

- National meeting of America's pharmacists and pharmacy students to discuss various health-related topics and their relevance to the practice of pharmacy.
- Voted on potential legislature affecting the face of pharmacy that would subsequently be presented on both the state and federal level.

21st Annual Seminar by the Sea Northeast Regional Conference in Newport, RI.
03/06

- Regional meeting of the northeast's pharmacists and pharmacy students to learn more about a number of current interest topics pertaining to the practice of pharmacy such as the significant events that have characterized the introduction of the Medicare Part D benefit, the key elements that constitute a robust medication therapy management (MTM) program, and the origins and epidemiology of pandemic influenza.

43rd Annual Medicinal Chemistry Meeting-in-Miniature (MIKI) Meeting, hosted by the University of Minnesota in Minneapolis, MN.
07/05

- Provided graduate students experience in presenting their research at a scientific meeting.
- Provided a catalyst for the sharing and exchanging of ideas between students and faculty of the different universities in attendance.

American Pharmacists Association 2005 Annual Meeting and Exposition in Orlando, FL.

04/05

- National meeting of America's pharmacists and pharmacy students to discuss various health-related topics and their relevance to the practice of pharmacy.
- Voted on potential legislature affecting the face of pharmacy that would subsequently be presented on both the state and federal level.

Academy of Student Pharmacists Mid-year Regional Meeting in Worchester, MA.
11/04

- Regional meeting to discuss various issues related to legislation on the state and federal level as it pertains to the practice of pharmacy.

PEER-REVIEWER:
Public Library of Science (PLOS) ONE

- (2015) PLOS ONE 2014 Reviewer Thank You. PLoS ONE 10(2): e0121093. doi:10.1371/journal.pone.0121093

MENTORSHIP:
Lowenstein laboratory:

- Robert Doherty, B.Sc.
  - Laboratory technician
- Julian Bahr, B.Sc.
  - Rotating first-year graduate student from the Program in Biomedical Sciences at the University of Michigan
- Peter Chockley, B.Sc.
  - Rotating first-year graduate student from the Graduate Program in Immunology at the University of Michigan.
- Padma Kadiyala, B.Sc.
  - Laboratory technician

Sorger laboratory:

- Stephanie Davis, B.Sc.
  - Research Assistant IV/Animal Coordinator

HONORS/AWARDS:

- American Cancer Society (ACS) Postdoctoral Fellowship Awardee – 2017-Present
- Selected as 1st place abstract at the 2015 Cancer Center Fall Research Symposium sponsored by the University of Michigan Comprehensive Cancer Center – 2015
- Selected as a "Top 10" Poster at the 19th Annual Scientific Meeting of the Society for Neuro-Oncology – 2014
- Recipient of the "Best Abstract" award at the Inaugural Immuno-Hematology Symposium sponsored by the Department of Pediatrics at the University of Michigan, Ann Arbor, MI – 2014
- Recipient of the "Best Graduate Student Presentation Award" at the Cell and Developmental Biology Retreat – 2014

- Awarded "1st Place Poster" at the Cancer Biology Graduate Program Retreat – 2014
- Recipient of the Department of Molecular and Medical Pharmacology's travel award – 2012
- Recipient of the "Certificate of Outstanding Achievement in the Area of Biomedical and Pharmaceutical Sciences Research" awarded by the College of Pharmacy at the University of Rhode Island, presented by the Dept. Chair, Clinton O. Chichester, Ph.D. – 2007
- The National Society of Collegiate Scholars – 2003-Present
- The Honor Society of Phi Kappa Phi – 2003-Present
- The Golden Key National Honor Society – 2004-Present
- The Rho Chi Society, Beta Pi Chapter, University of Rhode Island – 2004-Present
- University of Rhode Island Dean's List – 2001-2007
- Undergraduate cumulative GPA – 3.86 (on 4.0 scale)

PATENTS:

- "Ligand Binding Stabilization Method for Drug Target Identification"
  U.S. Patent No.: 8,703,438
  Date of Patent: Apr. 22, 2014

PROFESSIONAL AFFILIATIONS:

- American Association for Cancer Research (AACR)-Associate Member – 2013-Present
- American Society of Gene and Cell Therapy (ASGCT)-Associate Member – 2012-Present
- Rhode Island Pharmacists Association (RIPA) – 2007-Present
- American Pharmacists Association (APhA) – 2004-Present
- Academy of Student Pharmacists (ASP) – 2004-2007
- Rho Chi Society, Beta Pi Chapter, Executive Board Treasurer – 2005-2006
- HonorSociety.org member – 2013-Present
