The Country Chronologies to Exchange Rate Arrangements into the 21st Century: Will the Anchor Currency Hold?

Ethan Ilzetzi, Carmen M. Reinhart, and Kenneth S. Rogoff

NBER Working Paper No. 23135

February 2017

JEL No. E5,F3,F4,N2

**ABSTRACT**

Detailed country-by-country chronologies are an informative companion piece to our paper “Exchange Arrangements Entering the 21st Century: Which Anchor Will Hold?,” which provides a comprehensive history of anchor or reference currencies, exchange rate arrangements, and a new measure of foreign exchange restrictions for 194 countries and territories over 1946-2016. The individual country chronologies are also a central component of our approach to classifying regimes. These country histories date dual or multiple exchange rate episodes, as well as to differentiate between pre-announced pegs, crawling pegs, and bands from their de facto counterparts. We think it is important to distinguish between say, de facto pegs or bands from announced pegs or bands, because their properties are potentially different. The chronologies also flag the dates for important turning points, such as when the exchange rate first floated, or when the anchor currency was changed. We extend our chronologies as far back as possible, even though we only classify regimes from 1946 onwards.

## About the Chronologies and Charts

Below we describe how to use and interpret the country chronologies.

### *1. Using the chronologies*

The individual country chronologies are also a central component of our approach to classifying regimes. The data are constructed by culling information from annual issues of various secondary sources, including *Pick's Currency Yearbook*, *Pick's World Currency Report*, *Pick's Black Market Yearbook*, *International Financial Statistics*, the IMF's *Annual Report on Exchange Rate Arrangements and Exchange Restrictions*, and the *United Nations Yearbook*. Constructing our data set required us to sort and interpret information for every year from every publication above.

Importantly, we draw on national sources to investigate apparent data errors or inconsistencies. More generally, we rely on the broader economics literature to include pertinent information.

The chronologies allow us to date dual or multiple exchange rate episodes, as well as to differentiate between pre-announced pegs, crawling pegs, and bands from their *de facto* counterparts. We think it is important to distinguish between say, *de facto* pegs or bands from announced pegs or bands, because their properties are potentially different. The chronologies also flag the dates for important turning points, such as when the exchange rate first floated, or when the anchor currency was changed.

Note that we extend our chronologies as far back as possible (even though we can only classify from 1946 onwards.) The second column gives the arrangement, *according to our Natural classification algorithm*, which may or may not correspond to the official classification. In numerous cases there are dual or multiple rates in some periods. In these circumstances, our classification algorithm relies on the market-determined, rather than the official exchange rate. Over some periods the discrepancy between the official and parallel rate proved to be small. In these instances, we leave the notation in the second column that there are dual rates, but note in the third column that the premia is in single digits. For periods where the twelve-month monthly inflation exceeded 40 percent, our algorithm automatically categorizes these as freely falling exchange rate regimes—unless there is a

pre-announced peg crawling peg or narrow band that is verified. For the freely falling cases, the second column also notes whether there was a dual market and how our algorithm would categorize the regime absent knowledge of the inflation rate.

The third column in our chronology gives further sundry information on the regime— e.g., the width of the announced and *de facto* bands, etc. The third column also includes information about developments in the parallel market premium and currency reform.

**Afghanistan**

<b>Date</b>	<b>Classification: Primary/Secondary/Tertiary</b>	<b>Comments</b>
1936-January 1952	Peg to Indian rupee	The Afghani replaces the Afghanistan rupee in 1927.
February 1952-January 1958	Multiple exchange rates/Parallel market	Multiple exchange rate system created; Indian rupee is main anchor currency.
February 1958-September 4, 2002	Multiple exchange rates/Parallel market	There are multiple exchange rates. Indian rupee is main anchor currency. Data of parallel market rate incomplete.
September 4, 2002-September 2016	De facto crawling peg	US dollar. A new currency, the Second Afghani, is introduced; multiple exchange rate practices are discontinued.

**Albania**

*April 29, 1991*

<b>Date</b>	<b>Classification: Primary/Secondary/Tertiary</b>	<b>Comments</b>
November 1946-May 1948	Peg/Parallel market	At par with Yugoslavian dinar.
June 1948-December 26, 1991	Multiple exchange rates	Link of the Lek to the Ruble.
January 1992-July 1, 1992	Freely falling/Dual Market	Official rate is pegged to the ECU. In practice, the official rate for the Lek was fixed against the US dollar since January 20, 1992.
July 1, 1992-September 1993	Freely falling/Freely floating	Markets are unified on July 1, 1992
October 1993-May 1996	Freely floating	
June 1996-January 1998	Freely falling/Freely floating/Parallel market	
February 1998-December 2009	De facto crawling band	+/-2% band, DM, Euro.
January 2014-September 2016	De facto peg	+/-1% band, Euro.

**Algeria**  
July 5, 1962

<b>Date</b>	<b>Classification: Primary/Secondary/Tertiary</b>	<b>Comments</b>
1878–November 1942	Peg	Algerian franc is introduced. French franc is legal tender alongside Algerian franc after August 8, 1920. On May 20, 1940, foreign exchange controls are introduced.
November 1942–December 6, 1944	Peg	UK pound. Incorporated into Sterling Area.
December 6, 1944–December 1946	Peg	French franc. Return to Franc Zone.
January 1947– January 26, 1948	Peg/Freely falling	French franc.
January 26, 1948–September 20, 1949	Freely falling/Dual market	
September 20, 1949–April 10, 1964	Peg	French franc.
April 10, 1964–August 1, 1972	De facto band/Parallel market	Horizontal +/-5% band; French franc. Dinar replaces Algerian Franc. Introduction of foreign exchange controls in 1967. Parallel market premium in the 30–70% range.
August 1, 1972–January 21, 1974	Managed floating/Dual market	Officially pegged to French franc.
January 21, 1974–December 1987	De facto crawling band/Dual market	+/-5% band; US dollar. Parallel market premium reaches 469% on April 1985. The official rate is pegged to a basket of undisclosed currencies.
January 1988–March 1994	Managed floating/Parallel market	
April 1994–January 1995	Freely falling/Managed floating/Parallel market	
February 1995–February 1999	De facto crawling band /Parallel market	+/-2% band; French franc/Euro.
March 1999–September 2016	De facto crawling band /Parallel market	+/-2% band; US dollar.

**Andorra**

<b>Date</b>	<b>Classification: Primary/Secondary/Tertiary</b>	<b>Comments</b>
1813–January 1, 1999	Exchange rate arrangement with no separate legal tender	French and Spanish currency co-circulated as legal tender.
January 1, 1999–October 2016	Exchange rate arrangement with no separate legal tender	Euro

**Angola**

*November 11, 1975*

<b>Date</b>	<b>Classification: Primary/Secondary/Tertiary</b>	<b>Comments</b>
September 1926- December 31, 1958	Peg	Portugese Escudo. The Angolar is introduced.
December 31, 1958- January 8, 1977	Peg/Parallel market escalates post 1964	Portuguse Escudo. The Angolan escudo replaces the Angolar. No data for parallel market rate for full period.
January 8, 1977-September 25, 1990	Parallel market	The Kwanza replaces the Angolan escudo. The link to the Escudo is broken and Angola ceases to be a member of the Portugese Currency Area. The official rate is pegged to the US dollar.
September 25, 1990-November 18, 1991	Freely falling/Parallel market	New Kwanza replaces old Kwanza. Price data only begins at this time.
November 18, 1991-July 1, 1996	Freely falling/Dual market	There are multiple exchange rates.
July 1, 1996-May 21, 1999	Freely falling/Parallel market	The official rate is pegged to the US dollar and the official dual system disbanded. Active parallel market. No data for parallel market rate.
May 21, 1999-May 2005	Freely falling/Freely floating	A new currency, also called the kwanza was introduced. On May 24, the central bank stopped setting the official rate, leading to the virtual unification of the foreign exchange market.
June 2005-August 6, 2007	De facto peg	US dollar.
August 6, 2007-January 2011	De facto peg/Multiple exchange rates	US dollar There a multiple (three) spot exchange rates.
February 2011-June 2014	De facto horizontal band /Multiple exchange rates	+/- 2% band; US dollar.
July 2014-September 2016	Freely falling/ De facto crawling band /Multiple exchange rates	+/- 2% band; US dollar. Currency crash January 2016

**Anguilla, UK Overseas Territory**

East Caribbean Central Bank States are: Anguilla, Antigua and Barbuda, Dominica, Grenada, Montserrat, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines

<b>Date</b>	<b>Classification: Primary/Secondary/Tertiary</b>	<b>Comments</b>
1900-1935	Exchange rate arrangement with no separate legal tender	British and US gold coins circulate.
1935-October 6, 1965	Currency union/Peg	UK pound. British West Indies Dollar is introduced. It is issued by the East Caribbean Monetary Authority.
October 6, 1965-July 7, 1976	Currency union /Peg	UK pound. East Caribbean Dollar replaces British West Indies Dollar.
July 7, 1976-October 2016	Currency union/Peg	US dollar. On October 1, 1983 the East Caribbean Central Bank replaces the East Caribbean Monetary Authority. Parallel premium higher in 1980s.

**Antigua and Barbuda**

*November 1, 1981*

East Caribbean Central Bank States are: Anguilla, Antigua and Barbuda, Dominica, Grenada, Montserrat, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines

<b>Date</b>	<b>Classification: Primary/Secondary/Tertiary</b>	<b>Comments</b>
1900-1935	Exchange rate arrangement with no separate legal tender	British and US gold coins circulate.
1935-October 6, 1965	Currency union/Peg	UK pound. British West Indies Dollar is introduced. It is issued by the East Caribbean Monetary Authority.
October 6, 1965-July 7, 1976	Currency union/Peg	UK pound. East Caribbean Dollar replaces British West Indies Dollar.
July 7, 1976-October 2016	Currency union/Peg	US dollar. On October 1, 1983 the East Caribbean Central Bank replaces the East Caribbean Monetary Authority. Parallel premium higher in 1980s.

**Argentina**

<b>Date</b>	<b>Classification: Primary/Secondary/Tertiary</b>	<b>Comments</b>
1933–January 20, 1934	Peg	French Franc
January 20, 1934–August 1939	Peg /multiple exchange rates	UK pound
August 1939–June 1950	Managed floating/Multiple exchange rates	US dollar is reference currenc. Most transactions take place at the free rate.
July 1950–May 1952	Freely falling/Managed floating/Multiple exchange rates	US dollar is reference currency and one rate is market determined. Most transactions take place at the free rate.
June 1952–November 1957	Managed floating/Multiple exchange rates	US dollar is reference currency and one rate is market determined. Most transactions take place at the free rate.
December 1957–March 1960	Freely falling/Multiple exchange rates	The parallel premium is trivial during much of this period.
April 1960–March 1964	Managed floating/Multiple exchange rates	Short-lived unification/floating in early 1962
April 1964–March 13, 1967	Peg/Parallel market	US dollar. Re-introduction of controls
March 13, 1967–May 1970	Peg	US dollar. Inflation stabilization plan. Controls were largely eliminated. Parallel premium is nil during this period.
June 1970–July 30, 1971	Peg/Freely falling	US dollar.
July 30, 1971–March 6, 1976	Freely falling/ Freely floating/Dual market	Parallel market premium hits 372 % in November 1974.
March 6, 1976–December 21, 1978	Freely falling/Freely floating	Premium is consistently above 20%.
December 21, 1978–February 1981	Pre–announced crawling peg/Freely falling	US dollar. The Tablita Inflation Stabilization Plan. Parallel premia is in single digits.
March 1981–December 1981	Freely falling/Freely floating/Dual Market	
January 1982–July 1982	Freely falling/Freely floating	
July 1982–June 14, 1985	Freely falling/Freely floating/Dual Market	
June 14 1985–March, 1986	Peg /Freely falling	US dollar. The Austral Inflation Stabilization Plan.
April 1986–December 20 1990	Freely falling/Freely floating/Dual Market/Multiple exchange rates	The Austral Plan’s second phase was a crawling peg which lasted until September 1986; dual market. For May 1989–March 1990, hyperinflation.
December 20, 1990–January 29, 1991	Freely falling/Freely floating	
January 29, 1991–March 1991	Freely falling/Freely floating	US dollar. A “Target zone”—broad band is introduced.
April 1991–February 1992	Peg (Currency Board)/Freely falling	US dollar. The Convertibility Plan
March 1992–December 1, 2001	Peg (Currency Board)	US dollar.

**Argentina (continued)**

<b>Date</b>	<b>Classification: Primary/Secondary/Tertiary</b>	<b>Comments</b>
December 1, 2001– December 2, 2002	Freely falling/Dual market	Capital controls are introduced. There are multiple exchange rates. Brief formal dual market during January 5-February 11, 2002. Until the restrictions on deposit withdrawals are lifted on December 2, 2002 there is a de facto dual market.
December 2, 2002- July 17, 2006	De facto crawling band	+/-2% band; US dollar.
July 17, 2006— December 15, 2015	De facto crawling band /Dual market/Parallel market	+/-2% band; US dollar. A second rate is applied to some export proceeds. The parallel or “blue dollar rate” is active.
December 15, 2015- September 2016	Freely falling/Managed floating	December 15, 2015 the exchange market was unified. Currency crash January 2016.

**Armenia**

*August 23, 1990*

<b>Date</b>	<b>Classification: Primary/Secondary/Tertiary</b>	<b>Comments</b>
November 29, 1920-December 26, 1991	Exchange rate arrangement with no separate legal tender	Multiple exchange rates. USSR-Ruble zone.
December 26, 1991–November 1995	floating/Dual Market/Multiple	There is no price data before this date. Until the introduction of the Dram on November 22, 1993 the Russian ruble was legal tender. October 1993–December 1994 hyperinflation.
December 1995–December 2005 2016	De facto moving band	+/-2% band. US dollar. By end 1995 the parallel market premium had all but disappeared (Arpegis, 2000)
January 2006-September 2016		+/-2% band. US dollar. Inflation targeting framework

**Aruba**

*Territory of the Netherlands*

<b>Date</b>	<b>Classification: Primary/Secondary/Tertiary</b>	<b>Comments</b>
May 10, 1940-December 31, 1985, 1976	Currency union/Peg	Netherlands Antilles guilder is introduced and pegged to US dollar.
January 1, 1986-October 2016	Peg	US dollar. Aruban florin replaces Netherlands Antilles guilder at par. There is a parallel premium in 10-16% range in the 1980s.

**Australia**

<b>Date</b>	<b>Classification: Primary/Secondary /Tertiary</b>	<b>Comments</b>
January 1900-September 3, 1909	Peg	Gold Standard
September 4, 1909-July 14, 1915	Peg	Gold Standard. Australian pound is introduced. At par with pound sterling.
July 15, 1915-April 25, 1925	Peg	Suspension of gold shipments.
April 25, 1925-December 17, 1929	Peg	Gold Standard.
December 17, 1929-1939	Peg	UK pound. Suspension of gold standard and devaluation. Foreign exchange controls introduced on August 28, 1939.
1940-February 14, 1966	Peg/Parallel market	UK pound. There is an active parallel market for US dollars. Through 1955 the premium remains in double digits.
February 14, 1966-December 22, 1971	Peg	UK pound. Australian dollar replaces the Australian pound.
December 22, 1971-September 25, 1974	Peg	US dollar.
October 1974-November 1982	De facto band	Horizontal +/- 2% band. US dollar. Officially pegged to a basket of currencies.
November 1982- December 12, 1983	Managed floating	
December 12, 1983-October 2016	Freely floating	
June 1993-October 2016	Freely floating	Inflation targeting framework.

<b>Austria</b>		
<b>Date</b>	<b>Classification: Primary/Secondary /Tertiary</b>	<b>Comments</b>
April 25, 1938–December 1945	Exchange rate arrangement with no separate legal tender	Reichsmark is legal tender until 1945. Military exchange rates are introduced in 1945.
December 1945–October 1946	Multiple exchange rates	In December the Austrian Schilling is reinstated. Exchange controls are tightened on July 25, 1946.
October 28, 1946–June 1948	Freely falling/Managed floating/Multiple exchange rates	Adoption of military exchange rates for commercial transactions. Parallel market premium hits 1,150% in November 1947. In 1947 inflation was 96%.
July 1948–July 1950	Managed floating/Multiple exchange rates	
August 1950–October 6, 1950	Freely falling/Managed floating/Multiple exchange rates	
October 6, 1950–August 1951	Freely falling/Managed floating/Dual market	Parallel market premium remains in two digits throughout this period.
September 1951–May 4, 1953	Managed floating/Dual market	Parallel market premium remains in two digits throughout this period.
May 4, 1953–February 17, 1959	Peg	US dollar. Unification of exchange rates.
February 17, 1959–August 24, 1971	Peg	German DM. Full convertibility. Black market dealings come to an end.
August 24, 1971–July 1980	De facto moving peg	German DM
August 1980 –January 1, 1999	De facto peg	German DM. March 1991 registers as a currency crash versus US dollar—none versus DM.
January 1, 1999–October 2016	Currency union/Freely floating	Euro.

Notes: Specifics on the common margins (snake) agreement, EMS, etc. are available from the detailed chronologies.

Military exchange rate refers to *Allied Military Currency*, AMC was a form of currency issued by the Allied powers during World War II, to be issued to troops entering liberated or newly occupied countries, as a form of currency control.

**Azerbaijan**

*August 30, 1991*

<b>Date</b>	<b>Classification: Primary/Secondary/Tertiary</b>	<b>Comments</b>
1920-December 31, 1992	Exchange rate arrangement with no separate legal tender	USSR-Ruble zone. There are multiple exchange rates.
December 31, 1992–January 1996	Freely falling/Freely floating/Dual Market	There is no price data before this date. December 1992–December 1994; hyperinflation.
February 1995–November 2008	De facto peg	US dollar.
December 2008-January 2015	De facto peg	US dollar.
February 2015-December 22, 2015	Managed floating	Officially a Bi-currency basket was introduced February 16, 2015. Large devaluations since February 2015
December 22, 2015-September 2016	Freely falling/Managed floating/Parallel market	Central Bank announces it will float; parallel market emerges. Currency crash January 2016.

**The Bahamas**

*July 10, 1973*

<b>Date</b>	<b>Classification: Primary/Secondary/Tertiary</b>	<b>Comments</b>
19 <sup>th</sup> century-December 18, 1946	Exchange rate arrangement with no separate legal tender	British coins and US gold coins circulate until 1934, then British notes ceased to be legal tender. Bahama pound notes begin to co-circulate with British notes.
December 18, 1946-May 25, 1966	Peg	UK pound.
May 25, 1966-May 1972	Peg	US dollar. Bahama dollar replaces the Bahama pound
June 1972–October 2016	Peg/Dual market	US dollar. An Investment Dollar is introduced to purchase foreign currency securities or real estate abroad.

**Bahrain**

*August 15, 1971*

<b>Date</b>	<b>Classification: Primary/Secondary/Tertiary</b>	<b>Comments</b>
1862-1959	Exchange rate arrangement with no separate legal tender	Indian rupee and UK pound circulate
1959-January 28, 1966	Peg	UK pound. Persian Gulf Rupee is issued by India for use in the region
January 28, 1966-June 23, 1972	Peg	UK pound .Bahrain Dinar introduced to replace Gulf Rupee
June 23, 1972-January 28, 1978	Peg	US dollar. Link to the pound is severed-dissolution of the Sterling Area
January 28, 1978-December 25, 2001	De facto peg	US dollar. Official peg to SDR
December 25, 2001-October 2016	Peg	US dollar.

**Bangladesh**

*March 26, 1971*

<b>Date</b>	<b>Classification: Primary/Secondary/Tertiary</b>	<b>Comments</b>
January 1, 1972-July 1, 1974	Peg	UK pound. Taka is introduced to replace Pakistan Rupee
July 1, 1974-August 13, 1979	De-facto crawling peg/Dual Market	+/-1% band; UK pound. Secondary market rate is introduced for remittances
August 13, 1979-January 11, 1983	De-facto crawling peg/Dual market/Multiple exchange rates	+/-1% band; UK pound. Peg to an undisclosed basket of currencies (the intervention currency remained the pound)
January 11, 1983-January 1992	De-facto crawling peg/ Dual market/Multiple exchange rates	Peg to basket of currencies. The intervention currency was changed to the US dollar.
January 1992-	De-facto crawling peg/Parallel market	US dollar. Markets are unified in January 1992 and exchange controls are relaxed. Parallel market premium remain high until end-1997
December 1997- January 2012	De-facto crawling peg	US dollar. Officially, moved to managed float on May 31, 2003.
February 2012-September 2016	De-facto peg	US dollar

**Barbados**

*November 30, 1966*

<b>Date</b>	<b>Classification: Primary/Secondary/Tertiary</b>	<b>Comments</b>
1935-October 6, 1965	Currency union/Peg	British West Indies Dollar. Peg to UK pound. British West Indies Dollar is introduced. It is issued by the East Caribbean Monetary Authority.
October 6, 1965-December 3, 1973	Currency union/Peg	East Caribbean Dollar is pegged to UK pound. East Caribbean Dollar replaces British West Indies Dollar.
December 3, 1973-September 2016	Peg	US dollar. Barbados dollar replaces the East Caribbean dollar on December 3, 1973.

**Belarus**

*July 27, 1990*

<b>Date</b>	<b>Classification Primary/Secondary/Tertiary</b>	<b>Comments</b>
1922-December 26, 1991	Exchange rate arrangement with no separate legal tender	Multiple exchange rates USSR-Ruble bloc
December 26, 1991–February 3, 1997	Freely falling/Freely floating/Multiple exchange rates	There is no price data before this date.
February 3, 1997–March 31, 1998	Freely falling/Freely floating	There are multiple rates. Exchange rates are unified on January 1 <sup>st</sup> , 2003. Officially, the arrangement is a crawling band around a basket of currencies.
March 31, 1998–December 2002	Freely falling/Freely floating	
January 1, 2003-December 2010	De facto peg to US dollar	
2011-2012	Freely falling/Parallel market	There are large devaluations as oil prices and the Russian Ruble collapse.
January 2013-December 2014	De facto crawling /Parallel market	+/-2% band; US dollar. The rate of crawl (depreciation) has increased consistently and there are periodic large devaluations.
January 2015-September 2016	Freely falling/Managed floating	Currency crashes in 2015 and 2016.

**Belgium**

<b>Date</b>	<b>Classification: Primary/Secondary/Tertiary</b>	<b>Comments</b>
March 31, 1936–May 10, 1940	Peg	Gold Standard
May 10, 1940–October 5, 1944	Peg	Reichsmark Capital controls
October 5, 1944– April 1954	Managed floating/Parallel market	Officially pegged to US dollar. The official foreign exchange market was re opened on November 1949, after this the parallel market premium fell to single digits. Data for parallel market rate incomplete.
April 1954–July 18, 1955	Peg	US dollar
July 18,1955—March 5, 1990	De facto peg /Dual market	German DM. Belgian-Luxembourg Economic Union BLEU
March 5, 1990–December 31, 1998	De facto peg	German DM. Exchange markets are unified.
January 1, 1999–October 2016	Currency union/Freely floating	Euro.

Notes: Specifics on the common margins (snake) agreement, EMS, etc. are available from the detailed chronologies.

**Belize**

*September 21, 1981*

<b>Date</b>	<b>Classification: Primary/Secondary/Tertiary</b>	<b>Comments</b>
October 1894-December 31, 1949	Peg	US dollar. British Honduras dollar issued at par with US dollar; there are no devaluations during this period
December 31, 1949-January 1, 1974	Peg	UK pound.
January 1, 1974-May 28, 1978	Peg/Parallel market	UK pound. Belize dollar replaces the British Honduran dollar on January 1, 1974.
May 28, 1978-October 2016	Peg/Parallel market	US dollar. Broke link to the pound and pegged at 2 to 1 to the US dollar.

**Benin**

*August 1, 1960*
