WGS 1421. Medical Management of the Female Body
Thursdays, 1-3 pm, Sever Hall 212
Prof. Sarah Richardson
srichard@fas.harvard.edu
Office hours: Wednesdays, 10-12 am, Boylston Hall G-26, by online appointment

Course overview

This upper-level seminar examines how Western medical knowledge, practices, and institutions define female health and normality and manage diseased and gender-variant female bodies. We will explore how medicine conceives of the female body as a medical problem or mystery and consider how race, class, and sexuality inflect medical conceptions of the female body. Topics include "female maladies," medicalization of childbirth and the pregnant body, medical management of transgender and intersex bodies, medical conceptions of ideal body weight and fitness, gender norms and cosmetic surgery, women and disability, and pharmaceutical marketing toward women. Limited enrollment; Instructor's permission and application required.

Course readings

All readings are posted on the course website in PDF form or as web links. Please bring them to class along with your reading notes.

Course guidelines

Course website:
The course website is a primary tool for this course and will contain the discussion forum and all of the required readings. Please check the site frequently.

Class announcements:
Announcements will be posted on the course website. Special announcements will be sent to your Harvard email account. You are responsible for checking the course website and your Harvard email regularly.

Class attendance:
This is a small discussion-based course that requires your on-time attendance and full participation. More than two absences or late arrivals for any reason may lead to dismissal from the course.

Office hours:
Please visit me regularly in office hours during the semester. If you are absolutely unable to attend the scheduled office hours, please email me to set up a time to meet.

Email:
Please keep email to a minimum and keep your emails brief and professional. Visit me in office hours if you have detailed questions about the assignments or readings. Do not rely on email for last minute questions.

Technology policy:
If a laptop or similar technology will benefit you in the classroom and you can use it without being disruptive, you are welcome to use it. Please use your judgment. Consider the positives and negatives for you and your learning style. Attend carefully to your participation in the class discussion. I recommend disconnecting your wifi. Please disable any sounds. The class expects the professor to step in if technology use becomes disruptive.

Statement on disabilities:
If you have a documented physical, psychological, or learning disability, please notify me within the first two weeks of the semester regarding reasonable and appropriate academic accommodations to help you succeed in this course.

Statement on academic honesty:
Academic dishonesty (cheating, fabrication, plagiarism, facilitating dishonesty) is prohibited and will lead to dismissal from the course and referral to Harvard disciplinary procedures.
Guidelines for Course Requirements

Participation
This is a student-centered seminar in which participation and intensive discussion is essential. Class participation is a central element of this course and will frame my evaluation of your academic performance.

Requirements:
○ Consistent on-time attendance
○ Completion of assignments by due date - requests for extensions and late assignments are not looked upon well
○ Bring course readings and notes to class and show evidence of deep reading, preparation, and critical thinking
○ Participate vigorously, constructively, and attentively in class discussion
○ Generous and invested contributions to course discussion board
○ Meeting with professor in office hours

Class Presentation
Each class will begin with a student presentation. The goal of these presentations is to enrich the class discussion with your perspectives and expertise, provide an opportunity to learn effective use of PowerPoint technology, sharpen your oral presentation skills, and improve your comprehension of the material by teaching it to others.

Sign-ups will be on Feb. 3. In consultation with the professor, you will design a 15-minute PowerPoint presentation outlining key concepts for the day's topic and framing discussion questions. Your presentation should effectively use images, multimedia, and textual analysis. 
Requires advance meeting with professor.

Requirements:
○ Set up meeting with professor - meet at least 1 week in advance
○ Careful reading of the materials
○ Email your PowerPoint file to the professor by 10 am the day of your presentation

Presentation elements:
○ Interest the audience in the topic and share what you found interesting, surprising, new, or provocative
○ Briefly outline the key concepts from the day's readings
○ Define any key terms
○ Briefly outline controversies and debates
○ Relate to themes and concepts from the course as a whole
○ IMPORTANT: Use images, multimedia, and textual analysis of quotations from the reading to facilitate understanding (make sure to include citations)
○ Close with one important question that you hope the class will engage
○ Maximum of 15 minutes (~10 slides)
Evaluation of your presentation will be based on the following elements:

- Preparation: Were you prepared? Is it obvious that you read closely and tried to get help if you needed it?
- Clarity: Was your presentation clear? Did you attempt to simplify complex concepts? Was your presentation organized and well thought-out?
- Content: Did you address all of the items above? You don't necessarily have to include all of them, but you should try to follow the basic outline.
- Discussion: Did your presentation facilitate the discussion? How did you answer questions from the professor and the class?
- Oral communication and presentation style: Did you speak loud enough? Slow enough? Clear enough? Did you have good eye contact with your audience? Were you responsive to the audience? Was your presentation engaging and interesting?
- Effective use of PowerPoint technology (IMPORTANT): Did the visual presentation enhance and enliven your talk? Did you find novel and relevant images and multimedia?

Discussion board postings
Due: 12 noon the day of each class

Our class discussion board will permit the continuation of discussion outside of class and provide an opportunity for you to formulate questions and responses to the readings prior to class. These brief, informal written reading responses will also help you identify topics, themes, questions, and material for your final project.

Requirements:
- Post at least one item by 12 pm before each class
- Minimum of one type-written page or 500 words (or two 250-word posts)
- Posting must reference readings and evidence critical, original engagement with the texts
- You may skip 1 post with no consequences for your grade
- You are encouraged to be active in the discussion forum and respond to others' posts. These additional postings need not conform to length/content requirements of the required posts.
**Final paper or project**

12-15 page research paper. Requires 4 page proposal with bibliography and advance meeting with professor.

The objective of the final paper is to allow you to pursue mastery and in-depth research in an area of special interest to you. The paper should engage your passion as well as your critical and creative faculties, and it should represent in conception and final product the interdisciplinary sources, methods, and debates at the heart of this course.

**Prior to writing your proposal, meet with the professor to discuss.** Then write a 4-page (double spaced) proposal laying out your question, the importance of this question to you, the sources and methods you will use, the feasibility of the project in the time allotted, and a brief outline or project plan. Provide a separate annotated bibliography, properly formatted, with at least 8 valid academic sources (these may be from our course materials). Under each citation, write a 1-2 sentence summary of the thesis of the source and its relevance to your project.

The professor will respond to your paper or project proposal. You may be asked to revise certain aspects of your plan based on this feedback. Your final project should be a polished realization of your proposal. The final version is due to the professor on May 9.

**Writing guidelines:**
- Advance an original argument or analysis using only your own ideas
- State your thesis clearly
- Use specific examples, quotations, and details to support your argument
- Clean grammar and spelling

**Formatting guidelines:**
- ~15 pages of main text and bibliography with minimum of 8 sources
- MS Word .doc format
- References are not included in the page count
- Provide complete citations in a consistent, recognized academic citation style of your choice
- Double-spaced
- 12 pt Times New Roman font
- 1 inch margins
- Name and page number on the upper right header of each page
