I. Heteroskedasticity- and Autocorrelation-Robust Standard Errors

Revised 1/8/15
II. Weak Identification

with Possibly Weak Instruments,” *Econometrica*, 73, 1351-1365.

An Identification Robust Econometric Analysis,” *Journal of Economic Dynamics and Control*, 30, 
1707-1727.

Heterogeneity,” manuscript, Princeton University.

Monetary Economics*, 44, 195-222.

Guggenberger, P. (2005), “Monte Carlo Evidence Suggesting a No Moment Problem of the Continuous 

Identification Failure,” *Journal of Econometrics*, 142, 134-161.

Anderson-Rubin and Lagrange Multiplier Tests in Linear Instrumental Variables Regression.” 
*Econometrica* 80: 2649-2666.

Parameters, Unrestricted Covariance Matrices and Identification,” *Journal of Econometrics*, 139, 
181-216.

Assuming Identification,” manuscript, Brown University.

Application to the Phillips Curve,” *Journal of Money, Credit and Banking*, 37, 421-449.

Revised 1/8/15
III. Structural Vector Autoregressions

Revised 1/8/15
