General Information

About the 2016 Hampton Symposium

The MGH Radiological Society, which fosters professional, scientific, and medical interactions among graduates of radiology training at Mass General, will host the Hampton Symposium on Friday, March 25, 2016.

Events begin at 12 noon in the O’Keeffe Auditorium, where our Distinguished Alumnus for 2016 will deliver a keynote address. This will be followed by poster summaries from the Center of Systems Biology followed by a meet-and-greet lunch and the viewing of the posters. After lunch there will be lectures by MGH Faculty on cutting edge radiology.

This year’s Distinguished Alumnus, A. Gregory Sorensen, MD is the interim CEO and the Executive Chairman of the board of directors for IMRIS.

Events conclude Friday evening at the majestic Boston Harbor Hotel for the 49th Annual Aubrey O. Hampton Lecture, dinner and dancing to a live band.

The 2016 Hampton Lecturer is Sanjiv Sam Gambhir, M.D., Ph.D., Virginia and D.K. Ludwig Professor of Cancer Research Chair, Department of Radiology, Professor by courtesy, Departments of Bioengineering and materials Science & Engineering, Director Molecular Imaging Program at Stanford (MIPS), Director Canary Center at Stanford for Cancer Early Detection, Stanford University School of Medicine.

Symposium Locations

The afternoon program will be held at the Massachusetts General Hospital, O’Keeffe Auditorium, located on the 1st floor of the Blake Building. Registration begins at 11:30am.

Hampton Lecture and Dinner Location

The Hampton Lecture and sit-down dinner will be held at The Boston Harbor Hotel. Registration opens at 5.45 pm.

The Boston Harbor Hotel is located just a short cab ride from the MGH Campus – estimated travel time is 10 minutes.
General Information

Description

Presented by the MGH Radiological Society, this CME course will include a symposium and poster session in the afternoon at the MGH Campus O’Keeffe Auditorium and the Hampton Lecture and sit-down dinner and dancing at the Boston Harbor Hotel.

Course Overview

The Frontiers in Imaging course is designed to educate practicing radiologists and radiology trainees about advancements in the field of radiology. The majority of lectures will be given by faculty of Harvard Medical School. Topics selected reflect pertinent issues facing the imaging field including molecular imaging and incorporation of advances in informatics to improve patient care. All speakers are well known in their fields and have been speakers at recent national and international radiology conferences. The theme of the course this year will be “Molecules & Bytes”. Lectures will focus on the burgeoning fields of molecular imaging and informatics. There will be four lectures dedicated for Molecular Imaging, the clinical impact of nanoparticles and their impact on oncology, and neurology. There will be four lectures on informatics and technology and their application on patient safety, trainee education, decision support, and the application of machine learning in medical imaging.

We will also present our popular Research Poster Session to highlight the state of the art work being done in the laboratory of Dr. Ralph Weissleder’s Center for Systems Biology Molecular Imaging Division. Topics include: PET/MR motion correction, Stem Cell Tx, in room PET for Proton Therapy and many more.

The course is designed to improve learner competence so that participating radiologists can apply new strategies in their clinical practice, thereby improving performance in practice.

1. Acquire competence in regards to the molecular imaging, nanoparticles, and their impact on disease and diagnosis of disease.

2. Acquire competence as to use of informatics to improve health care efficiency, education, and quality.

Learning Objectives

Upon completion of this course, participants will be able to:

1. Evaluate the impact of molecular imaging and nanoparticles on disease diagnosis and management.

2. Determine ways to use informatics to improve patient care and quality.

3. Incorporate informatics tools such as deep learning and clinical decision support.

4. Use informatics tools to improve training of residents, fellows, and staff.

Accreditation

The Harvard Medical School is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. The Harvard Medical School designates this live activity for a maximum of 4.0 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

ACGME Competencies

This course is designed to enhance the following Accreditation Council of Graduate Medical Education competencies: Patient care, medical knowledge, practice-based learning and improvement, and systems-based practice.

HMS Disclosure Policy

Harvard Medical School (HMS) adheres to all ACCME Essential Areas, Standards, and Policies. It is HMS’s policy that those who have influenced the content of a CME activity (e.g. planners, faculty, authors, reviewers and others) disclose all relevant financial relationships with commercial entities so that HMS may identify and resolve any conflicts of interest prior to the activity. These disclosures will be provided in the activity materials along with disclosure of any commercial support received for the activity. Additionally, faculty members have been instructed to disclose any limitations of data and unlabeled or investigational uses of products during their presentations.

### Faculty

- **James Brink, MD**
  - Professor of Radiology, HMS
  - Radiologist-in-Chief, MGH
- **Mukesh Harisinghani, MD**
  - Professor of Radiology, HMS
  - Radiologist, MGH
- **Tarik Alkasab, MD**
  - Instructor in Radiology, HMS
  - Assistant Radiologist, MGH
- **Pari Pandharipande, MD, MPH**
  - Associate Professor of Radiology, HMS
  - Radiologist, MGH
  - Director, MGH Institute for Technology Assessment
- **John W. Chen MD, PhD**
  - Associate Professor of Radiology, HMS
  - Associate Radiologist, MGH
- **Raul N. Uppot, MD**
  - Assistant Professor, HMS
  - Assistant Radiologist, MGH
- **Garry Choy, MD**
  - Instructor in Radiology, HMS
  - Assistant Radiologist, Division of Cardiovascular and Thoracic Radiology, MGH
  - Assistant Chief Medical Information Officer, MGPO
- **Ralph Weissleder, MD, PhD**
  - Thrall Family Professor of Radiology
  - Professor of Systems Biology, HMS
  - Director, Center for Systems Biology, MGH
- **Synho Do, PhD**
  - Assistant Professor, HMS
  - Assistant in Physics, MGH
Distinguished Alumnus Lecturer 2016

A. Gregory Sorensen, MD
Executive Chairman, IMRIS

Dr. Sorensen is the interim CEO and the Executive Chairman of the board of directors for IMRIS. As head of IMRIS, Dr. Sorensen brings a deep understanding of technology, the biological basis of disease, the importance of measurable outcomes, and the environment of clinical practice. Dr. Sorensen is a neuroradiologist, well known in the industry for his innovative research in medical imaging and for his expertise in clinical practice. His research and techniques are utilized by numerous centers throughout the world in phase II and III trials in cancer, stroke, and other illnesses. Dr. Sorensen holds a B.S. in Biology from California Institute of Technology, a M.S. in Computer Science from Brigham Young University, and a Medical Degree from Harvard Medical School.

Hampton Lecturer 2016

Sanjiv Sam Gambhir, MD, PhD
Virginia and D. K. Ludwig Professor of Cancer Research; Chair, Department of Radiology Professor by courtesy, Departments of Bioengineering and Materials Science & Engineering; Director, Molecular Imaging Program at Stanford (MIPS); Director, Canary Center at Stanford for Cancer Early Detection Stanford University School of Medicine

Dr. Gambhir is the Virginia & D.K. Ludwig Professor of Cancer Research and the Chair of Radiology at Stanford University School of Medicine. He also heads up the Canary Center at Stanford for Cancer Early Detection and directs the Molecular Imaging Program at Stanford (MIPS). He received his MD and PhD from the UCLA Medical Scientist Training Program. He has over 575 publications in the field and over 40 patents pending or granted. An internationally recognized researcher in molecular imaging with over $90 Million of NIH funding as the Principal Investigator, his lab has focused on interrogating fundamental molecular events in living subjects.
Organizing Committee

Laura Avery, MD
Assistant Professor of Radiology, HMS
Associate Radiologist, MGH

Garry Choy, MD
Instructor in Radiology, HMS
Assistant Radiologist, Division of Cardiovascular and Thoracic Radiology, MGH; Assistant Chief Medical Information Officer, MGPO

Efren Flores, MD
Instructor in Radiology, HMS
Assistant Radiologist, MGH

Michael S. Gee, MD, PhD
Assistant Professor of Radiology, HMS
Division Head, Pediatric Radiology, MGH; Associate Program Director in Radiology, MGH

Mykol Larvie, MD, PhD
Instructor in Radiology, HMS
Associate Radiologist, Nuclear Medicine and Molecular Imaging and Neurology, MGH

Raul N. Uppot, MD
Assistant Professor, HMS
Assistant Radiologist, MGH

Michael H. Lev, MD, FAHA, FACR
Professor of Radiology, HMS
Director, Emergency Radiology, MGH

Theresa McLoud, MD
Professor of Radiology, HMS
Vice Chair of Education, MGH

Victorine V. Muse, MD
Assistant Professor of Radiology, HMS
Radiologist, MGH

Sjirk Westra, MD
Associate Professor, HMS
Associate Radiologist, MGH
