## The Radcliffe Wave CARTOON\*

\*drawn by Dr. Robert Hurt, in collaboration with Milky Way experts based on data; as shown in screenshot from AAS WorldWide Telescope

#### Each red dot marks a star- The Rad Cliffe Wave

forming blob of gas whose distance from us has been accurately measured.

The Radcliffe Wave is **9000 light years long**, and **400 light years wide**, with crest and trough reaching **500 light years** out of the Galactic Plane. Its gas mass is **more than three million times** the mass of the Sun.

video created by the authors using AAS WorldWide Telescope (includes cartoon Milky Way by Robert Hurt)

#### The Radcliffe Wave

#### ACTUALLY 2 IMPORTANT DEVELOPMENTS

#### **DISTANCES!!**

We can now

measure

distances to gas clouds in our own Milky Way galaxy to ~5% accuracy.

Zucker et al. <u>2019</u>; 2020

#### **RADWAVE**

Surprising

wave-like

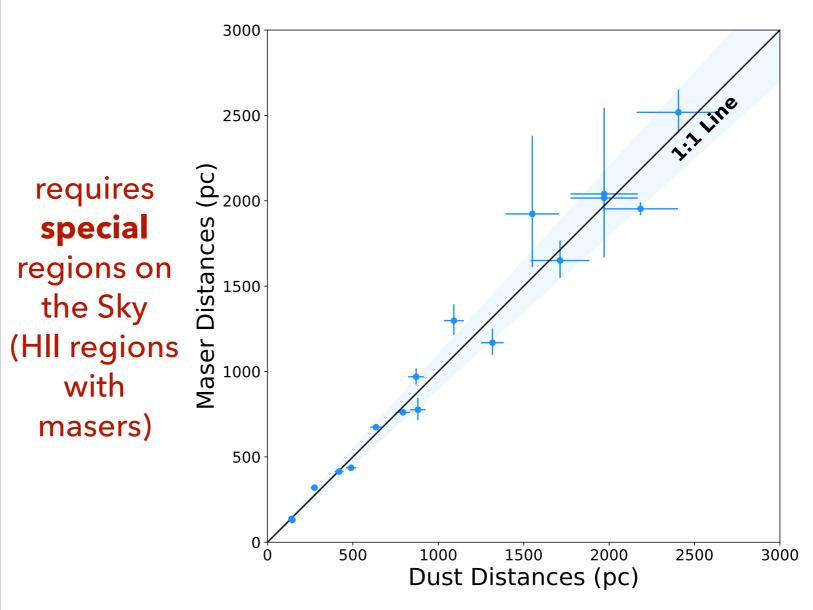

#### arrangement

of star-forming gas is the "Local Arm" of the Milky Way.

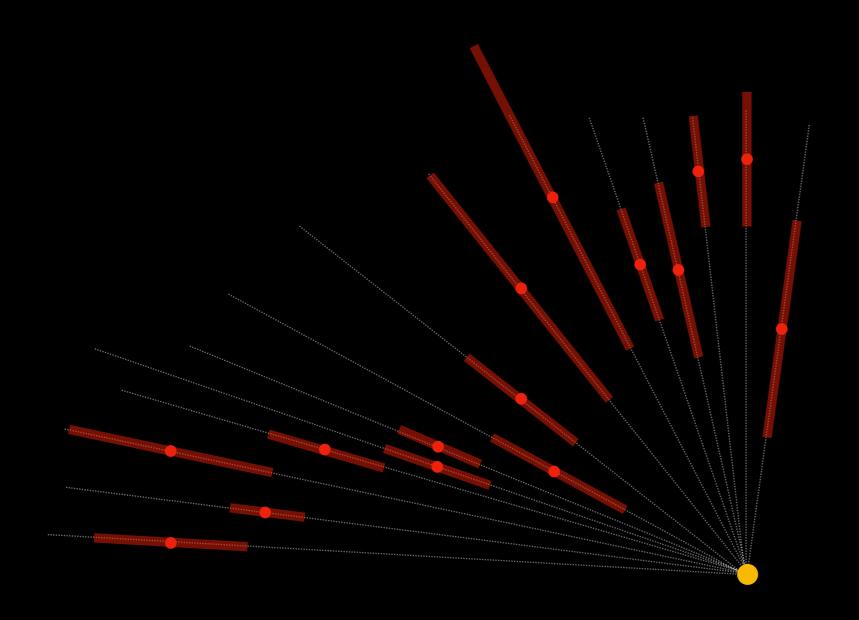

Alves et al. 2020

#### **DISTANCES!!**

We can now measure distances to gas clouds in our own Milky Way galaxy to ~5% accuracy.

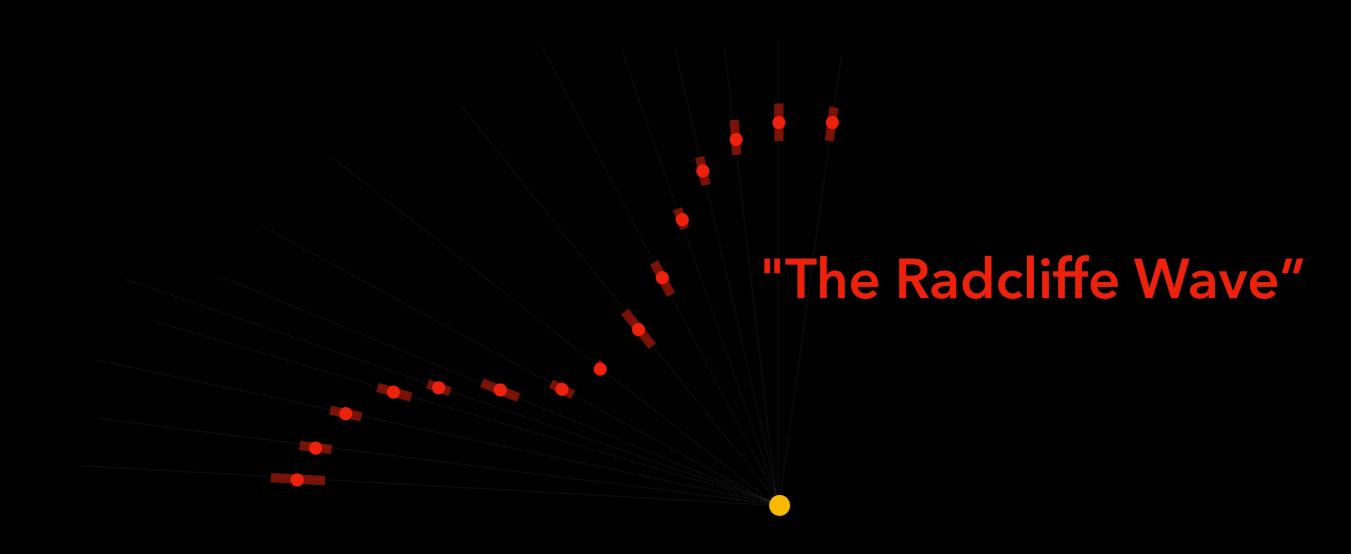

can be used **anywhere** there's dust & measurable stellar properties

Uncertain Distances

SCHEMATIC CARTOON(!)

SCHEMATIC CARTOON(!)

#### HOW= 3D dust mapping\*

+ Gaia\*

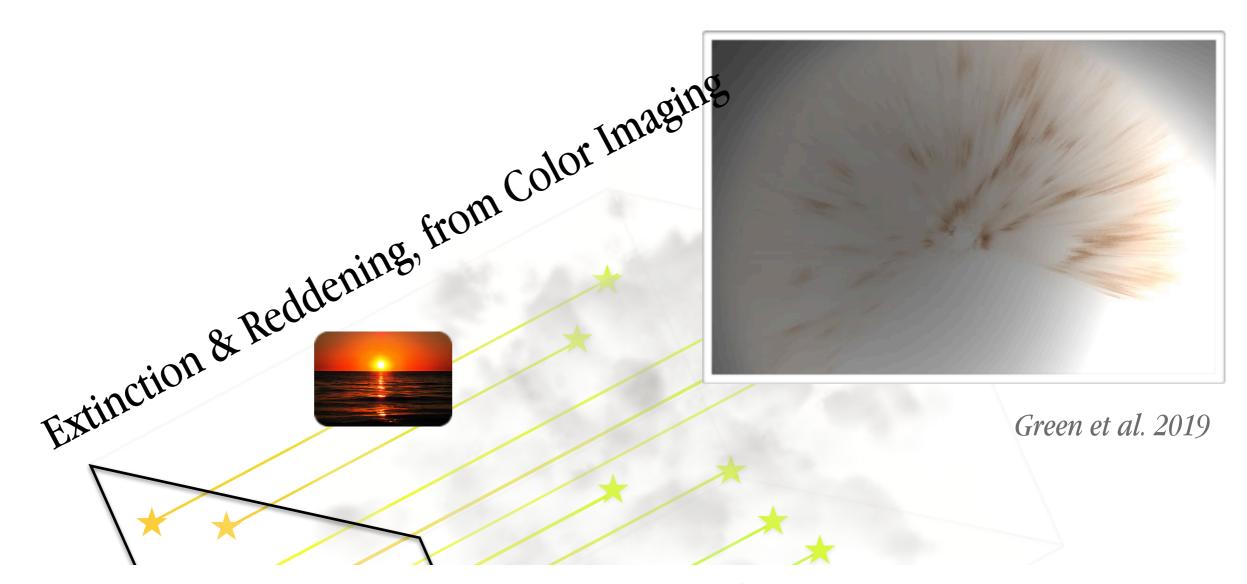

+ glue\*

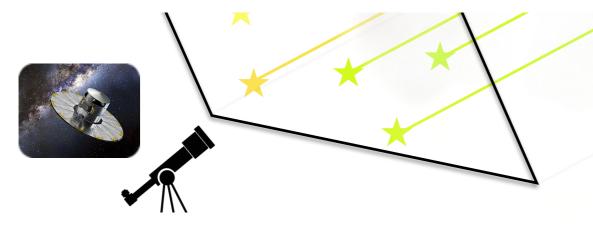

+ WorldWide Telescope

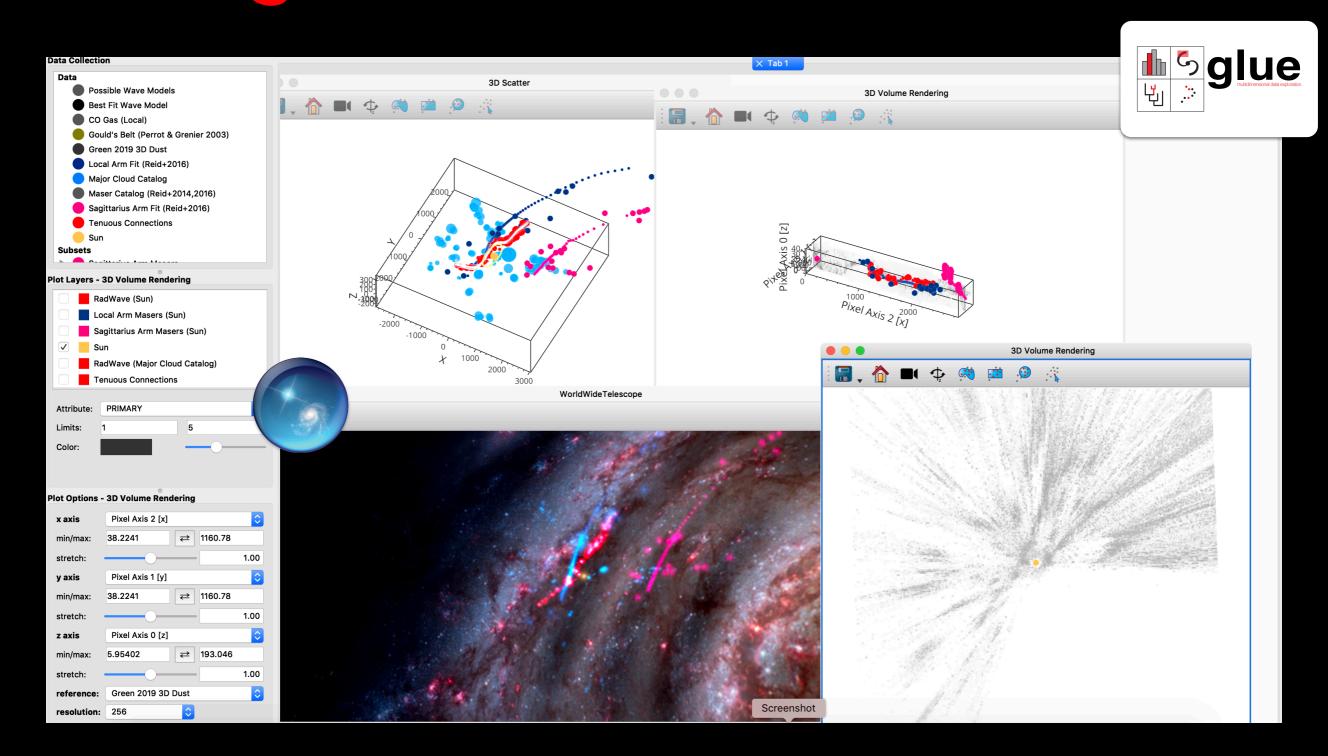

Can infer matter's distance from dust's effects on stars.

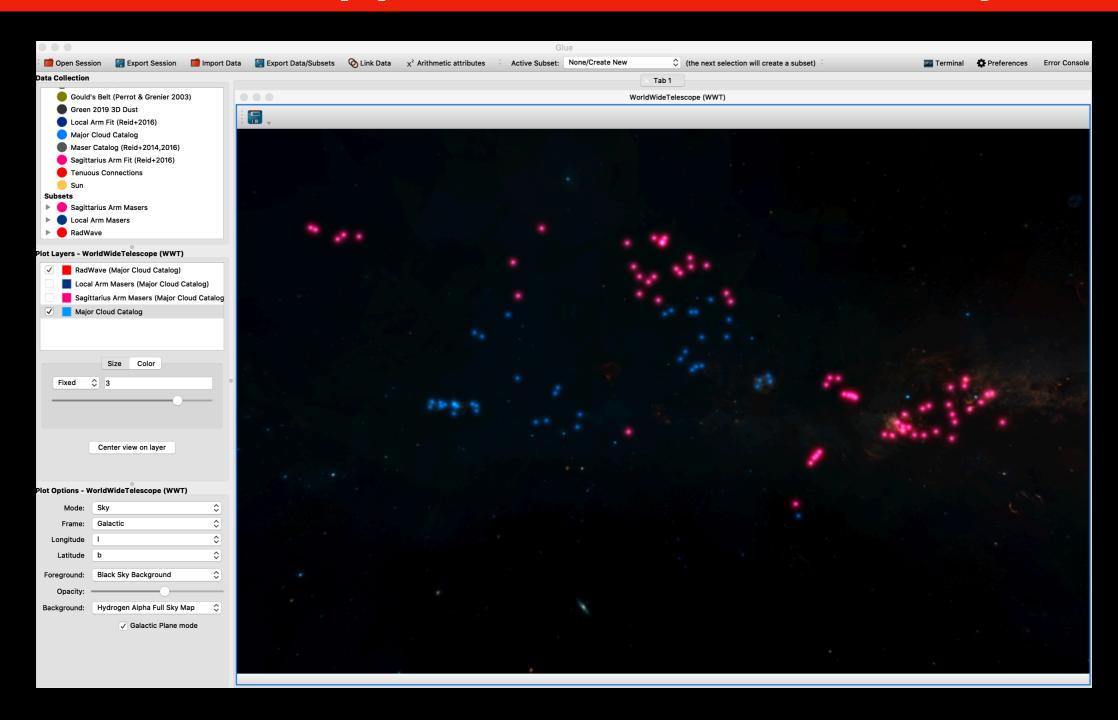

#### "Seeing" The Radcliffe Wave, in 3D

#### WHY DIDN'T WE FIND THE RADCLIFFE WAVE SOONER?

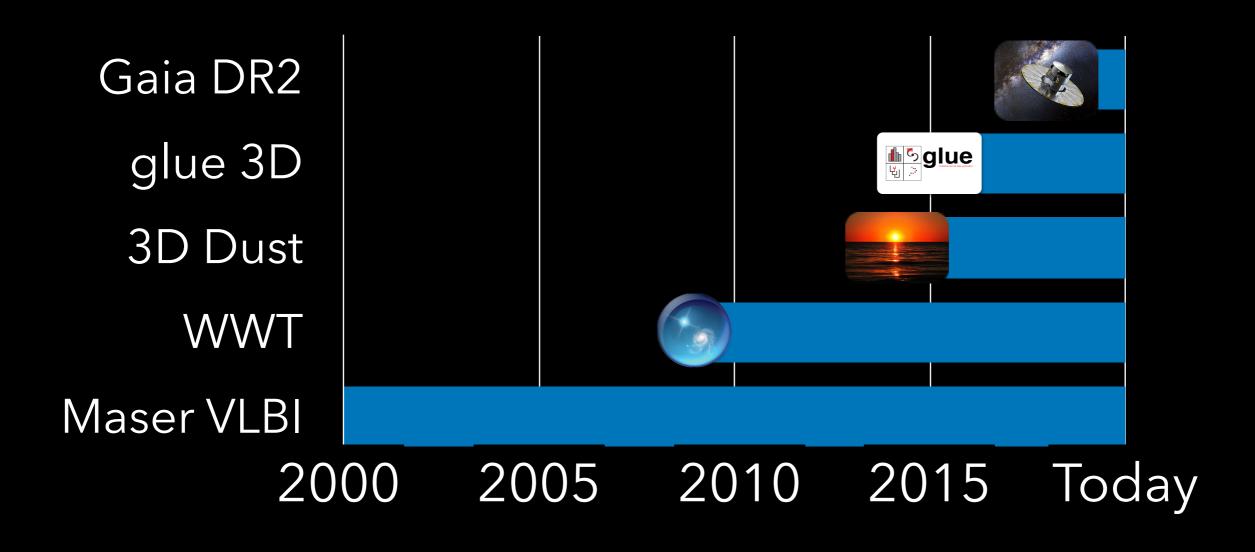

#### It's not apparent in 2D on the Sky.

AAS WorldWide Telescope: worldwidetelescope.org

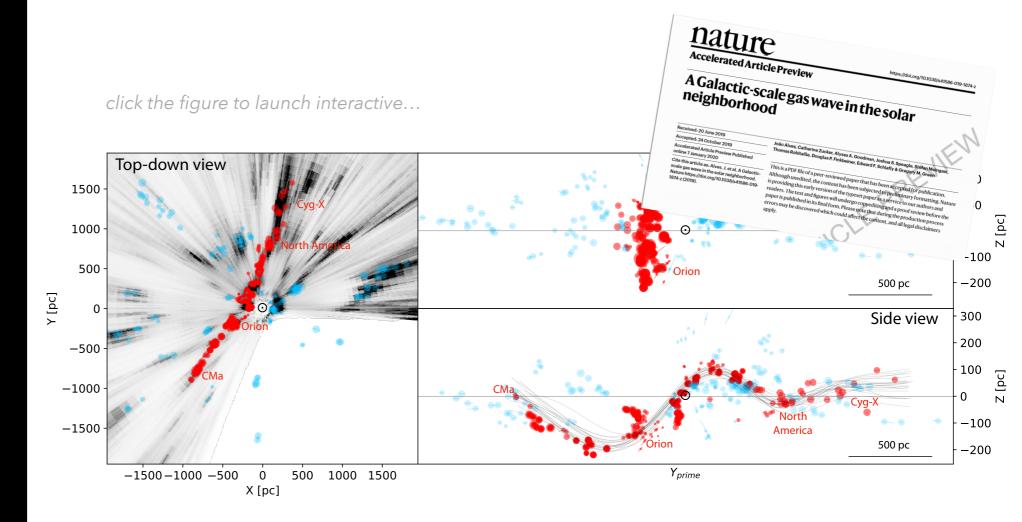

glue: glueviz.org

#### WHY DIDN'T WE FIND THE RADCLIFFE WAVE SOONER?

# Surprising wave-like arrangement of star-forming gas is the "Local Arm" of the Milky Way.

#### The Radcliffe Wave

João Alves, Catherine Zucker, Alyssa Goodman, Joshua Speagle, Stefan Meingast, Thomas Robitaille, Douglas Finkbeiner, Edward F. Schlafly, and Gregory Green 2020, *Nature* (7 January 2020)

<u>Alves et al.</u> Nature paper & two distance catalog papers by Zucker et al. (2019, 2020) include several interactive figures (via <u>plot.ly</u> & bokeh), and deep links to data (on Dataverse) and code (on GitHub) inspired by AAS "<u>Paper of the Future</u>" (Goodman et al. 2015)

#### **RADWAVE**

Surprising wave-like arrangement of star-forming

gas is the

"Local Arm" of

the Milky Way.

#### "So What," for Astronomers?

#### demise of "Gould's Belt"

end to 100-year-old paradigm

#### "Local Arm" not shaped as we thought it was, locally

arm is "straight" from top-down

#### big wave in "arm" never previously observed

wave's origin unknown (collision? dark matter? accretion?)

#### Open Questions

What is the ORIGIN of the Radcliffe Wave?

Collision?

Do other parts of the Milky Way show this wavy structure? How about other galaxies?

How can we SEARCH?

What do "waves " mean for the STAR-FORMING HISTORIES of galaxies?

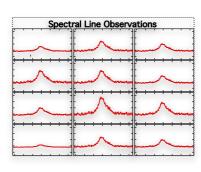

#### SURF the Radcliffe Wave
